

ACESO V11.8 RELEASE

Improved Xiaomi Support

Previously only Xiaomi's file system was acquirable unless certain Mi account settings were set. However, in the ACESO V11.8 release, we have made major changes to allow more data to be acquired, even without access to the Mi settings.

Line chat thread export

Line chat threads can now be exported, following a similar thread export method as WhatsApp. This allows Operators to export important and relevant Line chats easier and quicker.

ACESO V11.7 RELEASE

Android 15

The ACESO V11.7 update includes support for the recent Android 15 release, as well as support for the latest Google Pixel 9 devices.

WhatsApp performance improvements

We've now vastly improved the speed of decoding Android WhatsApp data. For example, to decode 350,000 WhatsApp messages used to take approximately 1.5 hours. Now, with ACESO V11.7, to decode the same number of messages takes just 5 minutes!

ACESO V11.5 RELEASE

Samsung Galaxy S24, S24+, S24 Ultra added

ACESO V11.5 update includes support for the latest Samsung Galaxy S24 device range, as well as many other handsets such as the Google Pixel 8a.

iOS installed apps

Installed apps for iOS are now presented in a more Operator friendly way in V11.5 and third party installed apps are displayed in a more useable order.

WhatsApp Business for iOS

Chats using WhatsApp Business on iOS devices are now displayed in their own section of the Messages section of the Report.

Bug fixes and improvements

Fixes for WhatsApp, LINE and Telegram app updates, as well as general behind-the-scenes development and improvements are also included in ACESO V11.5.

ACESO V11.4 RELEASE

Facebook Messenger for iOS

ACESO V11.4 now supports data retrieval from Facebook Messenger on iOS devices. This ensures important chat data from this app can now be surfaced and included in the report, and brings the app support in line with Android capabilities.

Further Android improvements

We've also improved the acquisition process for Android devices. This includes making the app downgrade process more robust and user friendly, as well as improving the reliability of acquiring some Oppo and Realme devices.

New devices added

ACESO V11.4 has support for the Google Pixel 8 and Pixel 8 Pro (both on Android 14) as well and many others.
